Background of UMPSA Press

UMPSA Press was established in 2002 in parallel with the establishment of the University College of Technology Malaysia (KUKTeM). Initially, this Publication Unit was placed under the function of the Library, however after being upgraded to a public university in 2007, the publication unit was split into two department, namely Corporate Publications and Scientific Publications. Scientific Publications was placed as a unit in the Research and Innovation Office (PNI).

Under PNI, this publication unit is responsible for publishing scientific materials prepared by UMPSA lecturers for distribution and sale to the public. Based on these factors, the Publisher is seen to be able to stand on its own to generate income for the university. After almost eight (8) years, the Publisher was upgraded as a Responsibility Center (PTJ) in 2015 to support one of UMPSA's initiatives which is financial sustainability to generate income through book sales activities.

Vision

To make UMPSA Press a university publishing center that produces quality and superior publications.

Mision

UMPSA Press always strive to encourage and support the scientific writing of university academics in order to meet the needs of customers through the provision of high quality publications.

Objectives

1. Support the vision and mission of UMPSA as a developer and disseminator of knowledge through increasing the results of scientific publications to meet the needs of higher education;
2. Enriching the scientific collection through the publication of books and journals to become a reference source that can be owned by all sections of society;
3. Popularize engineering and technology knowledge through the publication of quality scientific books in addition to journals, proceedings and monographs;
4. Improving social responsibility through the organization of workshops, seminars, colloquiums, courses and so on.

Publish with UMPSA Press

1. We pursue globally accepted and high standards of scholarly publication. We use the recommendations provided by MAPIM and UMPSA.
2. If you want to publish a book or want advice on cost effective publishing, UMPSA Press can help.
3. We provide all services to help authors publish their books and e-books from proofreading, cover design and book content, to printing, distribution and book marketing. If you need advice on book distribution, please contact us. An ISBN number will be assigned for each book that we want to print and publish.

The services we offer are as follows:

1. Book editing
2. Book format
3. Book design
4. Promotion and marketing
5. Book sales
6. Book distribution
7. Publication consultation

JURNAL 2026

Construction

CONSTRUCTION welcomes articles and research contributions in Structures & Materials Engineering, Hydraulics and Hydrology Engineering, Soil Mechanics / Geotechnical Engineering, Construction Engineering & Project Management, Highway and Transportation Engineering, Environmental Studies & Wastewater Engineering, Geohazards Studies and Impact Assessment, Water Resources Engineering and Management, Applications of Geoinformatics in Civil and Environmental Engineering.

Current Science and Technology

CST is an open access, peer-review journal, published by UMP Press. It publishes reviews, communications and research articles that provide understanding in the aspects of science and technology.

Data Analytics and Applied Mathematics (DAAM)

DAAM is a biannually peer-reviewed journal (June and December Issues) - dedicated to publish significant advances covering data analytics and applied mathematics fields. DAAM welcomes submissions in statistics and data science, pure mathematics, operational research, applied mathematics, and computational mathematics.

International Journal of Automotive and Mechanical Engineering

IJAME aims to disseminate original research in Automotive and Mechanical Engineering and presents the latest development and achievements in scientific research to stimulate and promote academic exchange between scientists, engineers, and researchers. Original, innovative and novel contributions providing insight into analytical, computational modelling, and experimental research are encouraged. IJAME is indexed in Scopus, Emerging Sources Citation Index (ESCI), DOAJ, Index Copernicus, Ulrichsw eb, MyJurnal, Google Scholar, ProQuest and Chemical Abstracts Service.

International Journal of Engineering Technology and Sciences

IJETS aims to provide an international forum for the presentation of research and intellectual discussions on issues of Engineering Technology and Sciences. IJETS welcomes recent developments and findings in Engineering Technology field, including (but not limited to), Construction and Infrastructure Technology, Manufacturing, Electrical, Electronics, Chemical, Energy Management and Energy Efficiency, Renewable Energy, Pharmaceutical Technology and Occupational Safety, Geotechnical, and Mining Engineering. IJETS is an open access journal, and published twice a year (every June and December) by UMP Press. IJETS is indexed in MyJurnal, Ulrichsw eb, Global Impact Factor, J-Gate, Innovative Journal Impact Factor and Chemical Abstract Services.

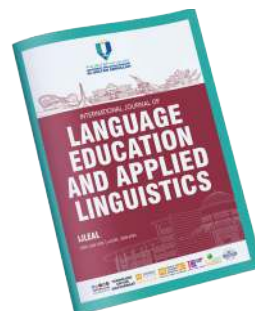

International Journal of Humanities Technology and Civilization

The Centre for Human Sciences publishes the IJHTC, an open access, peer-reviewed and refereed journal. IJHTC's main goal is to provide an intellectual platform for international scholars to share their knowledge. The goal of the IJHTC is to encourage interdisciplinary research in the humanities and social sciences. Research papers in the fields of Islamic studies, humanities technology, political studies, ethnic relations, technology management, communication and languages, technopreneurship, co-curriculum, education, culture, literature, arts, civilizations, religions, psychology and sociology, soft skills, leadership, values, and patriotism are published in the journal.

International Journal of Industrial Management

IJIM is a peer-reviewed international journal published four times a year (quarterly - April, July, October & December), valuable to those interested in the issues relevant to the technology, business, industrial engineering and management fields. It is a multi-disciplinary effort involving professionals, practitioners and scientists. It will specifically provide a unifying basis bringing together scholars, practitioners and government, among others. IJIM uses double-blind review and indexed by Google Scholar, MyJurnal, and CrossRef.

International Journal of Language Education and Applied Linguistics

IJLEAL is an open access peer-reviewed international journal that welcomes global submissions. Authors are encouraged to submit articles for the dissemination of knowledge on topics relevant to language education and applied linguistics. This journal invites research and intellectual discussions on issues of language education and applied linguistics of any language. IJLEAL is published quarterly in March, June, September and December. IJLEAL is indexed by Ulrichsw eb.

International Journal of Software Engineering and Computer Systems

JMES publishes original and review articles that advance the understanding of both fundamentals of engineering science and its applications. Original contributions providing insight into the use of analytical and computational modelling, structural mechanics, behaviour and applications of advanced materials, impact mechanics, strain localization and other effects of nonlinearity, fluid mechanics, robotics, tribology, thermodynamics, and materials processing are encouraged. JMES is indexed in Emerging Sources Citation Index (ESCI), DOAJ, Index Copernicus, Ulrichsweb, MyJurnal, Google Scholar, CiteFactor, EBSCOHost and CNKI.

Journal of Chemical Engineering and Industrial Biotechnology

Journal of Chemical Engineering and Industrial Biotechnology is an international, peer-reviewed platinum open-access journal published by Universiti Malaysia Pahang, Malaysia. All content is freely available without embargo or charge to the user(s) or institution(s). The journal's scope covers the areas of reaction engineering, advanced materials, separation process, transport phenomena, process systems engineering, environmental engineering, industrial biotechnology, and bioprocess engineering.

Journal of Governance and Integrity

JGI is an international, double-blind peer-reviewed, and open accessed journal publishing high-quality articles addressing human rights in business, ethics and culture in business, human governance, risk management, syari'ah governance, corporate social responsibility, IT-related governance and integrity, sustainability issue, supply chain and operations management, and Industrial Revolution 4.0-related issues. However, the journal is not confined to only these themes. JGI has been published twice a year (April and September). JGI uses double-blind reviews and is indexed by MyCite, Google Scholar, MyJurnal, and Crossref.

Journal of Mechanical Engineering and Sciences

JMES publishes original and review articles that advance the understanding of both fundamentals of engineering science and its applications. Original contributions providing insight into the use of analytical and computational modelling, structural mechanics, behaviour and applications of advanced materials, impact mechanics, strain localization and other effects of nonlinearity, fluid mechanics, robotics, tribology, thermodynamics, and materials processing are encouraged. JMES is indexed in Emerging Sources Citation Index (ESCI), DOAJ, Index Copernicus, Ulrichsweb, MyJurnal, Google Scholar, CiteFactor, EBSCOHost and CNKI.

Journal of Modern Manufacturing Systems and Technology

JMMST is a peer reviewed journal published by Faculty of Manufacturing and Mechatronic Engineering Technology, University Malaysia Pahang. The journal is published twice a year, in March and September. The journal publishes research and review articles. Only original articles that are not under consideration by other publishers are welcomed. Special issues are also welcome but interested special issue editors must submit a proposal to the Managing Editor for consideration. The journal is indexed in MyJurnal and Google Scholar.

Mekatronika

MEKATRONIKA accepts original research paper, as well as review papers in fields related to Robotics and Automation, Artificial Intelligence and Computational Intelligence, Intelligent Control, Instrumentation and System Integration, Signal and Image Processing, Modelling and Simulation. All submission must be done through this online submission system. MEKATRONIKA is currently indexed in MyJurnal and Google Scholar.

Sustainable Energy and Advanced Materials

The Sustainable Energy and Advanced Materials (SEAM) is an international, peer-reviewed platinum open-access journal published by the College of Engineering at Universiti Malaysia Pahang, Kuantan, Malaysia. The journal's scope is multi-disciplinary to bring together sustainable energy, materials science, and engineering aspects.
